

# CUT, FOLD, and POP!

Origami is the Japanese art of paper folding. It started in the 17<sup>th</sup> century and became very popular in the mid 1900s.

Pop-ups also became popular for kids in the USA during the mid 1900s, but their origin traces all the way back to the 1200s with the invention of the Lullian Circle in the kingdom of Majorca.
